NURTURING LONG-TERM WEALTH - OUR JOURNEY TOGETHER

WE UNDERSTAND HOW IMPORTANT WEALTH IS

Your wealth management journey begins with your relationship with one of our experienced wealth managers, who will work with you to determine how to achieve your goals. Your dedicated wealth manager will be your point of contact at Private Client Holdings. Our wealth managers are supported by teams of specialists from all the service pillars within our company - such as tax, portfolio management (both segregated and multimanager solutions), fiduciary services, as well as risk and cash management. Together, they will ensure that your wealth management strategy is well formulated.

OUR GOALS-BASED APPROACH TO WEALTH MANAGEMENT

Goals-Based Wealth Management (GBWM) integrates wealth planning and investment management into a cohesive, unified approach. Traditional financial planning invests your portfolio with a single risk profile and performance is measured relative to the market or benchmark performance.

In contrast, GBWM looks at what you really want to achieve with your hard-earned wealth for yourself and your family, during and after your lifetime. This is done by setting up individual goals based on your current lifestyle, and your future needs and wants. It is therefore a more complex and comprehensive process.

NURTURING WEALTH

Wealth Management

WE PRIORITISE WHAT YOU REALLY WANT TO ACHIEVE

Once your goals are defined, your wealth manager will assist you to monetise and prioritise these goals. Your existing assets or resources are then identified and allocated to each goal, as necessary.

Each of your goals will have a unique timeline, contribution or withdrawal stream and risk profile, and as such, each goal will have a different investment strategy. Once the investment strategy has been implemented, each goal is tracked and monitored to determine if the rate of return and contributions, or withdrawals, are on track to meet your objectives.

The PCH Goals Based Wealth Management process ensures you reach your desired goals because each plan is tailor-made to suit your lifestyle and financial objectives. Constant monitoring of the progress towards each of your goals will provide reassurance during potential bad market cycles or unforeseen personal circumstances.

QUESTIONS TO HELP YOU CLARIFY YOUR WEALTH GOALS:

- What is the purpose of your wealth - to maintain your lifestyle, leave a legacy or buy a superyacht?
- What are your dreams for the future, for your family, your business, and to help others?
- Does your wealth need you to personally manage it - how involved do you need or want to be?
- Consider the next generation - are they equipped to inherit the wealth you have created?
- What are the dynamics of your family - clarify what values are important to you?
- What are the risks facing your family and your family's long-term wealth?

OUR FAMILY OFFICE APPROACH TO WEALTH MANAGEMENT INCLUDES A FULL RANGE OF WEALTH MANAGEMENT SOLUTIONS

Segregated Portfolios

PROFESSIONALLY MANAGED PORTFOLIOS. INDIVIDUAL ATTENTION

OUR INVESTMENT PROCESS

Portfolios are designed to nurture your family wealth over the long term. Our investment process is guided by the collective decisions of an Investment Committee of experienced investment professionals, led by Grant Alexander as Chief Investment Officer.

Independence is a fundamental component of this process – we are an independent, director-owned and managed organisation. Our investment choices, the strategies we implement, and our day-to-day management are not influenced by any parent institution.

OUR SEGREGATED PORTFOLIOS

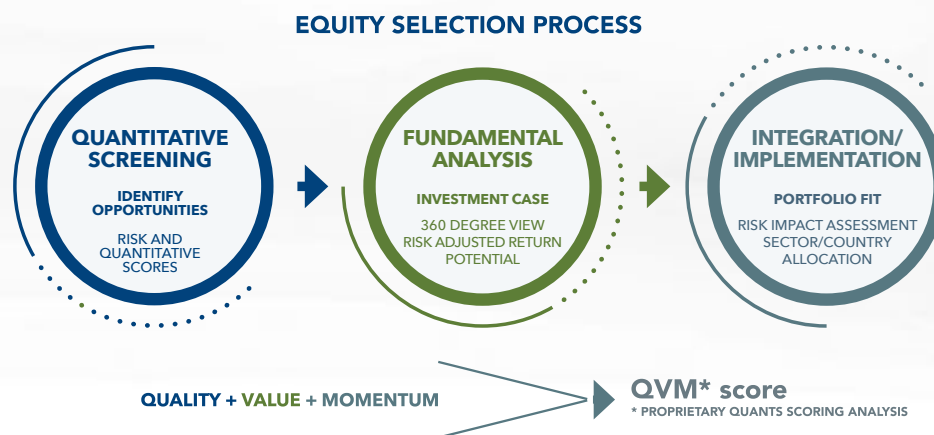

Our specialised segregated portfolio offering provides direct access to the investment expertise of a single manager. We offer a range of local and offshore portfolios which are invested in listed securities, including companies listed both locally and abroad, as well as listed property and exchange traded funds. Each portfolio is designed to meet specific needs and to assist clients in achieving their financial goals.

We have an enviable track record of consistently generating robust investment performance outcomes for our clients.

OUR EQUITY SELECTION PROCESS

The first step in our investment process is to identify quality companies that are not in financial distress and that trade at attractive valuations – not an easy challenge since businesses with these high-quality attributes and strong earnings power typically trade at premium valuations.

The second step involves fundamental bottom-up and top-down quantitative and qualitative analysis to establish an investment case for those companies. Companies are selected based on their potential for risk-adjusted returns and portfolio diversification.

Multi-Manager Solutions

OUR MULTI-MANAGER SOLUTIONS

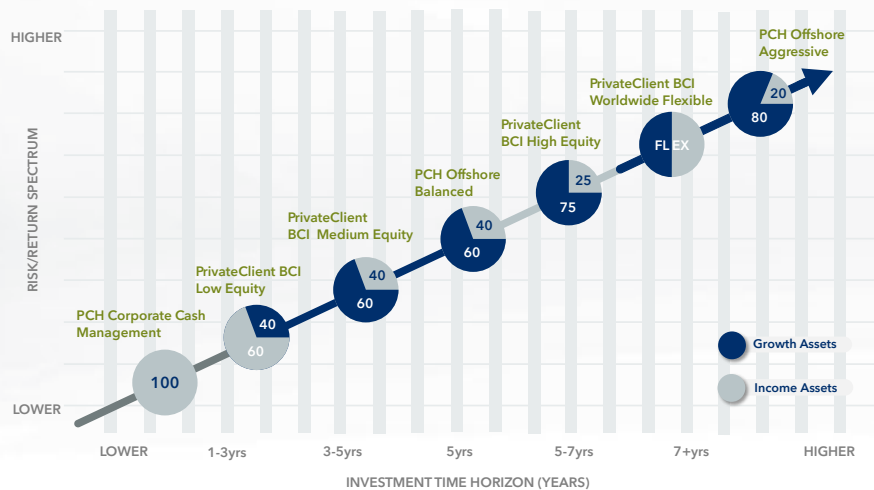

A hallmark of our success are the multi-manager solutions we have run since 2003.

In 2016 we integrated these multi-manager solutions into a range of risk-profiled Collective Investment Schemes (CIS). The different skills and investment styles of our managers are blended to reduce volatility and outperform over the long term, using a combination of best-of-breed local and global unit trusts.

Our multi-manager solutions are underpinned by our ongoing investment process, and we work on both micro and macro levels. We combine the views of leading independent investment houses with our own in-house research on global markets and economic matters.

From there, we develop a Multi-Manager Solutions House View that feeds into our asset allocation and our decisions on portfolio construction and manager selection.

OUR MULTIMANAGER FUNDS

OUR MULTI-MANAGER INVESTMENT PROCESS

NURTURING WEALTH

Asset Management

“Combining best-of-breed local and global unit trusts.”

Working from the bottom up, we set up investment objectives and long-term strategic asset allocations for each risk-profile solution. We focus on the tactical and strategic allocation of assets to shorter term neutral, over or underweight positions. Our Investment Committee then makes final decisions, and their recommendations are implemented.

This approach ensures that clients are offered a diversified portfolio of investments in different asset classes across a global fund universe that delivers competitively against benchmarks and appropriate risk parameters. Our managers have robust environmental, social and governance (ESG) policies and processes and as a team we are committed to sustainable investment practices.

Please visit our website (www.pcam.co.za) to see our range of portfolios and Minimum Disclosure Documents (MDD's) that unpack each fund and its composition, weighting, and performance in more detail.

DISCLOSURE:

Collective Investment Schemes in securities are generally medium to long term investments. The value of participatory interests may go up or down and past performance is not necessarily an indication of future performance. The Manager does not guarantee the capital or the return of a portfolio. Collective Investments are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees, charges and maximum commissions is available on request. Boutique Collective Investments (RF) Pty Ltd retains full legal responsibility for the third party named portfolio.

Private Client Trust & Fiduciary Services

A PERSONALISED SOLUTION THAT IS HOLISTIC, DYNAMIC AND, ABOVE ALL, SUSTAINABLE

Leaving a legacy is a wonderful gift, but it is also a complex one that must be thought through carefully. To make sure that your needs, as well as the needs of your beneficiaries, are met, we combine our extensive experience with in-depth analysis to assess both your current financial picture and the one you hope to achieve. The result: a personalised solution that is holistic, dynamic and, above all, sustainable. This includes estate planning, the drafting of Wills, formation of trusts, estate administration services as well as providing offshore and cross border advice to clients who live in multiple jurisdictions.

ESTATE PLANNING AND WEALTH TRANSFER

The first step in estate planning is to take a snapshot of how things currently stand, including personal circumstances such as shareholders' agreements and business partners. Once a clear view has been established a plan is then formulated with input from our Wealth Management, Family Office and Tax Planning teams. It takes into consideration any costs that may become payable at death; establishes whether there is sufficient capital available at death to offset debts as well as Executors Fees, Capital Gains Tax and Estate Duty.

TRUSTS AND TRUSTEESHIP

Depending on your unique needs, a trust can be a valuable tool in both tax and estate planning. They can be used for private individuals (a family trust) as well as for corporate business structures. Our significant experience in the duties and responsibilities of acting as a professional trustee means that we will always ensure that the proper care is taken in the management of the trust assets.

EXECUTORSHIPS AND DECEASED ESTATE ADMINISTRATION

Executorships and deceased estate administration in South Africa are highly regulated. They require both a working knowledge of the laws as well as the operation of the Master of the High Court's Offices. Our extensive experience in the wrapping up of estates and our comprehensive knowledge of tax, life assurance, the administrative process of the Master's Office and SARS means that your estate is handled timeously and with the greatest care and professionalism at a time when your family needs it the most.

WILLS

Wills and estate planning work hand in hand. Having a valid Will is essential to estate planning, just as knowing what your estate is worth is key to drafting a Will. It ensures that your estate is divested in the way you would like it to be.

Over and above the accurate distribution of sentimental items among beneficiaries, a carefully drafted Will can also avoid cash flow challenges and save on Estate Duty and Income Tax – and most importantly, it can help avoid family conflict.
